

Delivering integrated analytics, visualization, and security compliance for better business outcomes.

About Us

Headquartered in Ottawa, Ontario, Attain Insight® is a trusted analytics technology advisor to government and private sector firms, focused on delivering the right data-driven solutions that elevate decision-making for better business outcomes. Reseller partnerships with IBM®, Esri®, Precisely®, and technology expertise with Microsoft®, SAP®, and Oracle, offering on-premise, cloud, hybrid-cloud, and hosted analytics solutions. Specialized in (but not limited to): big data, analytics, AI, data science, visualization, location & map intelligence, data and information security, enterprise data access control, license compliance management, and migration.

Incorporated in 2008, Attain Insight has since made significant investments in acquiring proprietary technology to further develop into proven solutions to meet the needs of its clients including: **Attain Insight Security 4X®** for enterprise centralized security administration, access control and compliance management and **Attain Insight Map Intelligence™** a location intelligence platform, plug and play with leading big data analytic solutions, like IBM Cognos® Analytics and Esri ArcGIS®. The company is also unique as being the only IBM partner offering 'in-country' ITSG-33 compliant hosted analytic solutions to assist with challenging customer environments.

Dedicated to helping clients obtain maximum value from their Analytics software, Attain offers the breadth and depth of expertise in project management and team augmentation from planning and deployment - to training. The company specializes in fixed priced contracts, providing highly skilled business and technical talent for Business Analytics, Security and Location Intelligence related projects. Attain Insight provides consulting services (secret clearance if required) for short-term and long-term contracts. Sampling of customers include: Alterna Savings Bank, Bank of Canada, TD Enterprise Real Estate, Elections Canada, Export Development Canada, Government of Maine, Global Affairs Canada, Health Canada, Ottawa Police Services, Public Safety, Integra Life Sciences, Veolia Water Technologies, to name a few.

Technology

Attain Insight is experienced implementing a range of high-value complementary technologies such as:

- Analytics, Data Science and AI
- Business Intelligence (BI) and Reporting
- Visualizations, Dashboards, Scorecards
- Performance Management
- Strategy Planning
- Quality of Service Management
- Location & Map Intelligence
- Content & Data Security for Cognos
- Centralized LDAP Administration
- Authorized User Access Control
- Enterprise Security Policy Compliance
- License Compliance Management

Solutions

Because every business is unique, Attain Insight prides itself in listening to the needs of the customer and delivering a solution that is 100% focused on addressing the key requirements of the business. In addition, we offer industry-leading IBM-certified technologies to complement IBM Cognos software including:

- Geospatial (GIS) Analytics
- Information & Data Access Protection
- Fixed Asset Maintenance Cost and Depreciation Analytics
- Real-Property Utilization Analytics
- Sales Territory Mapping Analytics
- Insurance and Mortgage Fraud Analytics
- Product and Activity Cost Analytics
- Software License Compliance
- System, Server, and User Migration

Training

At Attain Insight we know that proper training is essential to the success of your business analytics software solution. Customers who invest in training realize the highest ROI in the shortest time period. We help you find comprehensive training that allows administrators, developers, professional authors and business analysts to master the skills required to be proficient with the Business Analytics software. Investing in education will benefit you with reduced costs, better ROI on your software investment, higher satisfaction amongst the users within your organization and lower dependency on your internal helpdesk/IT staff.

Research shows a close link between software training, employee skill level and project success. In fact, well-trained teams in certain disciplines have been found to be 10 percent more productive and were able to focus on higher value-added activities such as planning, refining processes, and improving infrastructure.

In addition to the standard training offerings (public, private, self-paced), we offer customized training for a range of users ensuring their success with their solution. Our on-staff certified instructors provide technical knowledge transfer to your business analytics and IT teams as well as role-based user training tailored for functions throughout your organization.

Services

Attain Insight helps remove the complexity of planning and implementing your next Analytics project. Our consultants employ best practices, anticipate issues before they occur, and safeguard your project from costly errors and delays.

Tailored to serve the needs of our clients, we offer assistance at all levels and stages including strategic consultations, solution design, project management, software and licensing purchases, training, testing and technical staffing to complete development plans for either on-premise or hosted solutions.

Our services include, but not limited to:

- Performance Management Strategy
- Data Quality Management
- Analytics Project Management
- Hosted Implementations
- Technical Assessment Services
- Data Warehouse Design and Implementation Oversight
- Analytics Project Management
- Assessment Services
- Migration and Upgrade Services

What Our Customers Are Saying

Alterna Savings Bank

"You guys really know your stuff and have been there for us every step of the way."

Public Safety Canada

"Attain Insight always delivers the right solution at the right time. We have no question about which IBM Cognos vendor we want to do business with."

Integra Life Sciences

"Attain Insight Security 4X is an amazing product, it's saved us -- not once, but twice! From what could have been a very costly software audit - to the fastest data warehouse move!"

Veolia Water

"Security 4X has really accelerated the process of building security policies. It has also simplified a lot of local administration, allowing our 15 Cognos Admins to concentrate on critical priorities."
